DESCRIPTION

CZ108 yellow brass has a copper content of not less than 62%, CuZn37 is the major brass alloy for the cold forming process. Even though brasses with lower zinc content have better cold forming properties, CuZn37 is the most used alloy. Reasons for this are on the one hand economical due to lower price of zinc compared to copper on the other hand the forming properties of this alloy meet the demand of many applications.

CHEMICAL COMPOSITION

| ELF RIHARD | Elements | | Min (%) | | | Max (%) | | |
|------------|-------------|--------|-----------|-------|-----------|---------|----|--------|
| | Cu | US MET | 62.00 | | - CMETAL | 65.00 | | |
| ELA | Pb | | This | | | 0.30 | | ENE |
| | otal Others | | . RHS HIL | REJHE | | 0.60 | ME | CETHUR |
| Barr | Zn | | | F | Remainder | | | |

MECHANICAL PROPERTIES ACCORDING TO BS2873 (AS PER TEMPER 1/2H)
